C2C Mechanical Systems	(250) 833-8413			

These installers guarantee their workmanship and are knowledgeable about the proper materials required.

Water Connections:

- A water service connection permit must be taken out prior to hooking onto our water system. The current hook-up fee is $250.00 plus a $100.00 inspection fee. Note that Water Rights requires that we physically inspect all service connections prior to backfilling.
- A pressure reducing valve (PRV) is required at the main service where it comes into the home.
- Connections to water services installed prior to 1984 or connections to water services installed more than 30 years ago are not permitted as the property owner is to pay for replacement of the existing service connection from the main to the property line, complete with new curb stop.
- **Do not turn water on or off yourself. All requests for turn-on or off must be made through Shuswap Lake Estates office at (250-675-2523) and our service personnel will make any turn-on or off requested. Allow two working days notice.**

Sewer Connections:

- In areas that are serviced by the sewage collection system, a $500.00 plus GST connection fee is to be paid at the time connection is made and a permit must be obtained from our office by the installer, prior to installation.

Water and Sewer:

- The water and sewer connections must remain uncovered for inspection and the request to our office must be made two days prior to the inspection. If you do not use one of the approved installers listed above, there is an additional $1,000.00 fee.
- Utility Charges: All lots that were developed after 1993 are to pay an Availability charge on Vacant Lots. Water is currently $462.00 per year, and Sewer is currently $210.00 plus GST per year.
- Once a customer has received approval to connect to the Water and/or Sewer, has passed inspection, and has been accepted by the Utility as a customer, the Availability charge will no longer apply. A pro-rated refund of the charge will be credited to the customer's account, and the customer will immediately begin residential quarterly payments for Water & Sewer if applicable.

No person, who is not an agent or employee of the Utility shall make any connections with or alterations to or tamper with any of the Utilities waterworks, nor turn on or off any water valve or curb stop of the Utility without prior authorization by the Utility in writing. A fine of $500.00 is applicable for each contravention.
